Abstract—State the problem, method, principal quantitative result, and contribution.

Index Terms—engineering, modeling, simulation, signal processing

I. INTRODUCTION

Introduce the problem, research gap, and contribution. Add citations using the official bibliography workflow required by the target venue.

II. METHODOLOGY

Describe the model, algorithm, simulation, experiment, or implementation.

III. RESULTS

Present quantitative evidence and comparisons.

IV. CONCLUSION

Summarize the contribution, limitation, and future work.
